Great Magics finished

by Tenoch on January 04

Commander Axolotl of the New Empire has declared the next thirty days to be Mocehuia, the Month of Resting. During this period, the Wolven will be secluded while they recover from casting their Great Magics. All feuds will be suspended, all conflicts will be halted. Any creature discovered to disobey the Rules of Mocehuia will be beaten by the Golems of Tlali and obliterated. All citizens are required to give one twentieth of their food to support the creatures created by the Wolven when they cast the Great Magics. Failure to do so will result in the offenders being fed to the creatures.

After the thirty days, Commander Axolotl will throw a great feast and celebration, which all will be able to attend. Formal wear is not required. At the end of the Heart Feast, the Wolven will leave their seclusion and be whole again.

Severed Clans leader captured

By Eztli on January 03

Warlord Uzzil-ak Dwarfsmasher, formerly of the Severed Clans, has been captured after a trivial battle. The warlord was found cowering behind an oak log after his pathetic troops scattered before Langvolke forces. He will be on display at the Barracks from 3:00pm to 5:00pm Saturdays for those wanting to view the one who dared defy the Empire. The Empress will deliver final judgement upon her visit.

With the warlord imprisoned, Commander Axolotl anticipates the remaining Severed Clans and Unshackled to realize their error and join the Langvolke. However, some may abuse our benevolence as weakness, and seek to falsely claim allegiance. If approached by a non-citizen seeking to join, inform the Constables immediately and detail the non-citizen, if possible. At no point should you trust a non-citizen unless first cleared by the Constabulary.
